BUSINESS TERMS

We Especially Invite Charge Accounts. A charge account is more convenient than to remit for each order at the time it is sent us; you pay no more for your goods by reason of this accommodation. As to our responsibility, we refer you to Dun's or Bradstreet's Mercantile Agency or any bank or trust company.

When sending your first charge order, if possible, send us the name and address of someone with whom you already have a charge account. This saves time.

REGARDS C. O. D. SHIPMENTS

Goods can be sent C. O. D. (with the exception of perishable items, which include plants and cold-storage bulbs; these cannot be sent C. O. D.). No C. O. D. shipments for any kind of goods can be made by express or freight out of town unless a partial remittance accompanies the order. No C. O. D. orders delivered where the amount is less than 50c., except in the following zone in Philadelphia: Market Street Ferry, to Sixteenth Street, Pine Street, to Vine Street. C. O. D. orders outside of this zone in our delivery limits must amount to \$1.00 or more. During April no orders C. O. D. in their entirety can be accepted.

SHIPPING INSTRUCTIONS

Always state by what method you want goods forwarded, otherwise we will ship according to our best judgment.

PACKING CHARGES

No charge is made for boxes, packing or bags, except for two-bushel seamless sacks, which are returnable for credit at the market price as charged.

PARCEL POST SHIPMENT AT OUR EXPENSE AS FOLLOWS

We pay postage charges on all orders for vegetable and flower seeds, provided the order calls for packets, ounces, quarter-pounds and pounds (beans, corn, peas and mixed grass seeds, bulbs, plants and sundries are not included). If these are wanted by mail, remit for postage according to rate of postage from Philadelphia to your post office.

Parcels Post weight limits are 70 lbs. in 1st, 2d and 3d zone; in all other zones 50 lbs.

2 MICHELL'S POT-GROWN STRAWBERRY PLANTS

EXTRA SELECTED STOCK—Strong and Well Rooted. Will Yield a Full Crop of Berries Next Season. Ready Now

The time of shipment is from July 1st to September 15th. The advantages in planting pot-grown strawberry plants are realized by a full crop of berries the following year. Our plants are carefully grown in clay pots and prior to shipment are transferred with the original ball of earth at their roots to substantial paper pots in which they are forwarded, thus insuring the buyer getting them in first-class order and reducing the transportation charges about 25 per cent.

CULTURAL NOTE ON STRAWBERRIES

Strawberries delight in good rich soil that has had plenty of manure added to it. The plants should be set 12 to 15 inches apart in rows 2 feet apart. A row 100 feet long requires approximately 75 to 100 plants or about 14,500 per acre. If the weather is dry, when planting, water well at the time and for a few days thereafter, if it is possible. Press the soil well around the ball, when planting, and keep the soil well cultivated, cutting off all runners that may form. At the approach of permanent winter it pays to cover the entire bed to a depth of 2 inches with clean straw or salt hay. This protects the plants during severe weather. Do not use leaves, as they hold the moisture and cause damage to the plants in winter. At the approach of spring, rake the covering from the plants proper and leave it between the rows; this will serve as a mulch during the summer, protect against drought, and also keeps the fruit more free from sand, at the same time to a large measure controls the growth of weeds.

EARLY VARIETIES

Early Jersey Giant (Perfect). Pre-eminently the finest of the early varieties. It is brilliant scarlet-crimson in color, and exceptionally firm, by far the firmest of all early sorts. Berries very large, conical with pointed tip; has delightful aroma and rich, mild strawberry flavor. A very heavy yielder.

Early Ozark (Perfect). Among the very first to ripen and the berries are of fairly good size, bright, crimson color, slightly conical, quite firm and of excellent quality. A strong grower and a heavy yielder.

Senator Dunlap (Perfect). This grand Strawberry will please the most critical person. One of the first to yield and continues well into the height of the season. It cannot be recommended too highly.

MID-SEASON VARIETIES

Bubach (I). A fine old standard variety, especially popular in the middle and northern States. The blossoms are imperfect and must be planted with some perfect flowering variety in order that they may be pollenized, otherwise they will produce no fruit.

Big Joe (Perfect). The merits of this splendid variety are great vigor of plant, splendid root system, exceptional productiveness, large size of fruit, excellent flavor, and length of bearing season. The berries are perfect beauties, of very uniform conical shape, rich and red in color. In size the berries are not surpassed by those of any other variety grown, while the flavor is superior to that of most large fruited sorts. The plants root very deep, the roots going 10 to 12 inches in the ground, and they are but little influenced by droughts.

A husky developed specimen like this can't fail but give you satisfaction

MID-SEASON VARIETIES (Continued)

Brandywine (Perfect). The finest of all mid-season sorts; it has not a single defect. The plants of extra strong constitution and growth, doing well everywhere. Fruit extra large, heart-shaped; color, bright, rich red.

Glen Mary (Perfect. Midseason). One of the best of the older varieties, as it still keeps its place among the prominent strawberries. The fruit is very large but rather irregular, somewhat like Sharpless. It is a great drought resister, ripening a full crop of luscious berries in the driest weather.

Heritage (Perfect). This is truly a giant strawberry, it being almost impossible to put a whole berry at a time in one's mouth. It is rather irregularly shaped but of a beautiful crimson color. The plants and foliage are entirely distinct which makes it stand out above all other sorts.

Rewastico (Perfect). The berries are a light cardinal red, uniformly large and regular in shape. The fruit is firm enough to carry to distant markets in good condition. The quality is extra fine. Blossoms are perfect and rich in pollen. Price of Potgrown Strawberries on this page \$1.00 per dozen; per 100, \$6.00; \$50.00 per 1000.

NOTE—About October 1st we can furnish layer plants of any of the above varieties at 40c. per dozen.; 100, \$2.00; \$15.00 per 1000. If wanted by Parcel Post add 10c. per doz. or 20c. per 100 for postage. Larger quantities travel best by express.

LATE SEASON VARIETIES

See Special Cultural
Note on Page 2

First Quality (Perfect). Berries are very large and pointed, and of dark red color. Plants are very vigorous and very healthy. Blossoms are perfect, strong pollenizers, making it a good variety to plant with imperfect varieties. A good variety for the home as well as for shipping purposes.

Gandy (Perfect. Late). This variety is known to most every berry grower as one of the best late sorts. It is very solid and large, and of a beautiful crimson color; especially good for family garden planting.

Stevens' Late Champion (Perfect). "Very large, fine flavored, bright color, good shipper, heavy yielder, good fruit stem." This berry has averaged 7556 quarts per acre, netting \$666.96 per acre. It has been tested on all kinds of soils and will grow successfully where any strawberry will grow. It will stand a drought better than any other berry ever grown in this section. It has never shown any sign of rust.

Price of Pot-grown Late-Season Varieties Strawberries,
\$1.00 per dozen; per 100, \$6.00; \$50.00 per 1000.

Stevens' Late Champion

NOTE—About October 1st we can furnish layer plants of any of the above varieties (except as noted) at 40c. per doz.; per 100, \$2.00; \$15.00 per 1000. If wanted by Parcel Post add 10c. per doz. or 20c. per 100 for postage.

MICHELL'S SPECIAL GRADE BONE MEAL

An excellent fertilizer to use when planting strawberries; about a teaspoonful to a plant. 25 lbs., \$1.25; \$2.25 per 50 lbs.; 100 lbs., \$4.00; \$7.50 per 200 lbs.

TESTIMONIAL

Manderson, S. D.
You certainly know how to pack plants. The basket of plants you shipped by express, just arrived; one month after it left your place. Not one plant was dead and they were fine specimens. Your seed also is unusually fine.

EDGAR M. KEITH.

MICHELL'S AUTUMN FRUITING OR EVER-BEARING STRAWBERRY PLANTS (Pot Grown)

This type, while producing its main crop of berries with the general sorts, continues uninterruptedly to mature its fruit, until checked by hard frosts; it has actually been known to bear strawberries until Christmas, when the weather is open and mild. In order to get the greatest crop of berries late, the blossoms should be kept cut off until August 1st, so as to conserve the energies of the plants for the fall crop. The plants must not be allowed to suffer for water in the fruiting season and a mulch of well rotted cow manure will be found of great advantage.

Peerless (New). This variety is claimed to be the best fall-bearing variety, producing right up to heavy frosts, as the fruit is protected by the large vigorous foliage.

Progressive. The berries are medium in size and delicious in quality. You can get fruit a few weeks after the plants are set and continue to bear until freezing weather.

Superb. The fruit is large, firm and of fine quality. In addition to its value as a fall bearer, Superb will bear an excellent crop of berries in the spring. They look well and ship well.

Price of Everbearing Strawberry Plants (Pot-grown), \$1.00 per dozen; per 100, \$6.00; \$50.00 per 1000.

4 MICHELL'S SEASONABLE VEGETABLE PLANTS

Extra Strong Celery Plants

(READY ABOUT JULY 10)

These plants are grown from our own seed at our Nurseries at Andalusia, Pa. We have immense quantities and can fill orders for any number.

A WORD ON CELERY CULTURE.—Celery delights in a good, rich, moist soil. Locations where the soil may become dry should be avoided. Nothing is more beneficial or so little work as the watering of celery during periods of drought. After it has been transplanted and made some growth, the plants should be set in permanent rows 6 to 8 inches apart in the row. Many private gardeners prefer to use the two-row system of trenches; it will be found very advantageous to work. If the idea of the market gardener is carried out, the celery is planted in single rows about 2 feet apart, 6 or 8 inches apart in the row. By the former method the celery is usually banked up to blanch until almost entirely covered with soil; the top is then covered with leaves or other litter as winter approaches. In the single-row system the celery is banked up gradually to blanch, and after this process is over, at the approach of winter it is dug up and laid in shallow trenches after being cleaned. Storing for winter is done by covering it with waterproof celery paper and topping off with soil or leaves. The celery may thus be gotten out for market during the severest weather. Good cultivation is highly necessary during the growing period.

French Golden Self-Blanching. An early sort. The heart is a rich golden-yellow, with light yellowish-green outer leaves.

Giant Pascal. One of the largest stalked kinds. It is in its prime for use during February and March, and can be used well up into spring.

White Plume. The White Plume is unsurpassed for fall and early winter use, requiring very little earthing to blanch it.

Winter Queen. This variety grows a very thick, solid and heavy stalk, and has a large heart. It is a close, compact grower, and when blanched is a creamy-white color.

Michell's Golden Self-Blanching Celery

PRICE OF CELERY PLANTS

75c. per 100; 500 for \$3.25; \$6.00 per 1000.

We cannot supply less than 50 celery plants of any one variety.

If wanted by Parcel Post add 15c. per 100 for postage.

Brussels Sprouts

BRUSSELS SPROUTS PLANTS

(Ready from July 1st to August 15th)

Matchless Improved. The plants should be well cultivated and kept free from insects. When heads begin to crowd, the lower leaves should be broken from the stem of the plant to give them plenty of room. 25 for 25c.; 75c. per 100; per 1000, \$6.00.

If wanted by Parcel Post add 10c. per 100 for postage.

CABBAGE PLANTS

Late Flat Dutch. A short stemmed, large, flat-head variety; very solid; keeps the entire winter when buried in cellars or pits.

Red Dutch Drumhead. This cabbage is very sweet and should be used more largely. It is an excellent winter keeper.

CABBAGE PLANTS (Continued)

Danish Ballhead. Unequalled for keeping qualities, massiveness and weight of heads.

Price of any of cabbage plants, 25 for 25c.; 60c. per 100; per 1000, \$4.00.

We cannot supply less than 25 cabbage plants of a variety. If wanted by Parcel Post add 10c. per 100 for postage.

MICHELL'S GIANT FLOWERING PAEONIES

7

Paeony Candidissima

No disease or insect ever troubles this plant. They delight in a sunny location in deep rich soil. After planting water regularly until you feel they are established and always take care to see that the crown or top of root is not more than 1 to 2 inches below the surface when covered. The roots are perfectly hardy and once planted remain for years, increasing in size. Roots can be delivered beginning in April or in the autumn beginning in September.

DOUBLE TREE PAEONIES

These very beautiful and free-flowering paeonies deserve to be included in every collection. They are from 2 to 3 weeks earlier than any other variety.

Our stock of these while comprised of named sorts, large-flowering varieties is in mixture only, so that we are unable to definitely determine the colors. However, they are so beautiful that any of the shades will prove a desirable acquisition.

Tree Paeonies. Extra strong plants, \$1.25 each; per doz., \$12.

MICHELL'S RELIABLE BULBS

FOR SUMMER AND EARLY AUTUMN PLANTING

Easter in 1920 Comes on April 4th

*ALLIUM (Neapolitanum) (Ready in August)

Used exclusively for indoor culture in pots and pans. It is especially adapted to forcing and makes an excellent cut flower; color pure white. Height, 12 inches. It is not hardy, so cannot be planted outdoors. Dozen and 100 lots mailed free. Each, 2c.; 20c. per doz.; per 100, \$1.25; \$10.00 per 1000.

AMARYLLIS

One of the most gorgeous showy house plants, giving splendid satisfaction, not only because of their requiring little care, but of their everlasting nature and tendency to increase.

Cultural Directions.—Place bulbs in live moss, only moderately moist, near a window of a warm room. Watch the bulbs carefully, and when the first sign of growth appears through the top, get a six-inch pot and be ready to pot up. The soil to be used should be fairly rich and when the bulb is set, most of it should be above the soil. Be moderate in watering first, but increase as growth increases, then place in a warm, light room near the window.

Hybrids of Vittata. Beautiful species, flowers striped and flaked. 60c. each; per doz., \$6.00.

Johnsoni. A very large crimson sort, striped white. Mammoth bulbs, 60c. each; per doz., \$6.00. First size bulbs, 40c. each; per doz., \$4.50.

White Calla Lily

CALLA LILY BULBS

(Ready in September)

Callas require good, rich soil and plenty of warmth and water to make them thrive. Plant Callas indoors only.

GODFREY DWARF EVERBLOOMING CALLA (New)

This comparatively new calla has proven an excellent one; its character is exactly like the *Æthiopica* or regular variety, except it is of much dwarfier habit and freer bloomer; very desirable as a pot plant. Large blooming size bulbs, 25c. each; doz., \$2.50; \$15.00 per 100.

Purity Freesia

FREESIA "PURITY"

This grand type supersedes all the old varieties of Freesias. The flowers are almost twice the size of the regular type; they also differ somewhat, being a pure glistening white; the stems are often 15 inches long and very wiry, rendering it a most valuable cut flower. Each bulb will produce 3 or 4 flower stems.

FREESIA FISCHERI (New)

A vast improvement over Purity Freesias and is described by the originator as the finest, largest, purest, strongest and most fragrant of all Freesias. Pure white without a trace of yellow. Each, 15c.; \$1.50 per doz.; per 100, \$10.00; \$85.00 per 1000.

FREESIA NEW LAVENDER

Equal in size to the "Purity." This variety produces flowers of excellent form and of splendid texture and of a delicate lavender. Price, each, 15c.; \$1.50 per doz.; per 100, \$10.00.

TESTIMONIAL FROM JAPAN

The bulbs arrived here this morning per parcel post. They were all in perfect condition. Let me express my thanks for the careful execution of my order.

Yours truly,

F. OYAMA, 49 Fushi Midai, Dairen.

SPECIAL NOTICE.—Owing to the new Plant Quarantine which took effect June 1, 1919, it is doubtful if a number of varieties of Bulbs can be imported. We hope that the law will be modified to such an extent to allow the importation of these bulbs. Varieties affected by this law are marked with an asterisk (*).

For Summer and Early Autumn Planting

FRENCH ROMAN HYACINTHS

(Ready in August)

French Roman Hyacinths afford a continuous supply of bloom from early winter until late in spring if planted in succession (two weeks apart). They are very fragrant.

They are easily grown in pots or pans. The bulbs, if potted in August or September, the pots plunged in the open ground for a month, until the bulbs are well rooted, and then brought in the house, they can be had in flower in November or December, and a continuous supply of these delightful flowers may be had, by bringing in a few pots or pans of the rooted bulbs at intervals of about 2 weeks. The bulbs should be planted quite close together, a 6-inch pot or pan will be sufficiently large enough for six bulbs. They are not hardy and are not suitable for outdoor planting.

Michell's Monster White Roman Hyacinths

MICHELL'S EARLY NARCISSUS

(Polyanthus Type) (Ready in August)

This class of Narcissus is a most interesting one. They may be grown in water and pebbles like Chinese lilies, but they are equally suited for growing in soil. The flowers are produced in clusters, like the illustration, and they are delightfully fragrant. Not suitable for outdoors. Parcel Post Weight of Polyanthus Narcissus, 2 lbs. per doz.; per 100, 12 lbs.

Double Roman. White perianth, with an orange and yellow suffused cup, very free flowering and early. 4c. each; per doz., 40c.; \$2.75 per 100; per 1000, \$25.00.

Grand Monarque. Large, broad, white perianth with a primrose-yellow cup; a very striking flower. 6c. each; per doz., 50c.; \$3.25 per 100; per 1000, \$27.50.

Grand Primo. Large white perianth with yellow cup. 6c. each; per doz., 50c.; \$3.25 per 100; per 1000, \$27.50.

Grand Soleil d'Or (often called "Yellow Paperwhite"). Rich yellow, with deep red cup. For cutting this is a fine variety, as it makes a grand show. 10c. each; per doz., 90c.; \$6.50 per 100.

Paper White Grandiflora, First Size Bulbs. This is quite a specialty with us; of it alone we import over two million bulbs. It is a pure white flowering sort; used extensively for forcing, as it can be brought into bloom in 8 weeks' time; the stems are very long and it is excellent for bunching. 6c. each; per doz., 50c.; \$3.00 per 100; per 1000, \$27.50.

Paper White Grandiflora, Mammoth Bulbs. 8c. each; per doz., 70c.; \$4.00 per 100; per 1000, \$35.00.

LILIUM HARRISII

(The Bermuda Easter Lily)

Cultural Note—In order to obtain best results, attention to the following brief directions will assist materially: Upon receiving the bulbs, pot them immediately. Place a handful of well-rotted cow manure in the bottom of the pot and place the bulb directly on top, covering it with soil. After watering, place in an outside pit and protect from the direct rays of the sun; cover well with soil, ashes or any other suitable litter. When the bulbs have become thoroughly rooted, bring inside, in a temperature of about 60 degrees; let the plants grow slowly under a bench or some other suitable place until about 6 inches high; then place on top of the bench. About two months before Easter they can be brought into a warmer temperature and gradually forced into flower and height at one time. An occasional application of liquid cow manure, starting about six weeks before flowering time, will stimulate the plant wonderfully. Thorough rooting is the most essential point.

FOR SUMMER AND EARLY AUTUMN PLANTING

LILIUM CANDIDUM (Madonna Lilies)

(Ready in August)

This variety is sometimes called St. Joseph's, Madonna, or Annunciation Lily. One of the most popular and satisfactory of the American garden lilies. Pure waxy white flowers produced on straight stems bearing anywhere from 10 to 30 blooms of good size and substance; delightfully fragrant. Effective planting is the result of massing them in clumps or borders. Our bulbs are grown in Northern France, where they have a reputation of growing the finest in the world. To insure absolute success, plant the bulbs as early as possible—September preferred—6 inches deep imbedded in sand and placed on their side; height, 4 feet; blooms in June.

*ORNITHOGALUM ARABICUM (Star of Bethlehem)

(Ready in August)

(Delivery doubtful. See note on page 8)

A favorite white, spring-flowering bulb; plant in October for outdoor use, or in September for indoor blooming. Large bulbs. (Price may be established later.)

SAGO PALMS (Cycas Revoluta)

These interesting as well as ornamental plants may be grown from the dormant (leafless) trunk or stem with great success. Their cultivation is very simple and may be wintered in any conservatory or light living room. During the summer they can be placed upon the lawn, where they are most appropriate ornaments. We have just received a consignment from Japan, which will be the last to arrive, as the Plant Exclusion Law, which took effect June 1, 1919, prohibits the further importation of these plants. Fine strong dormant stems. 30c. per lb.; 5 lbs., \$1.25. Stems vary from 2 to 5 lbs. each.

MIXTURES FOR PLEASURE GROUNDS

(Continued)

Michell's Putting Greens Mixture

A quick-growing mixture of short, thin-bladed grasses, over which the ball can roll without resistance. We do not recommend less than 1 bu. of 25 lbs. to a green 75 feet square. Prices: 1 qt., 35c.; 4 qts., \$1.25; 1 peck, \$2.25; 1 bu. (25 lbs.), \$9.00; 100-lb. lots and over, 35c. per lb.

Teeing Grounds Mixture. Used on golf courses or in places where a tough, resisting turf is wanted (20 lbs. per bu.). 25c. per qt.; 4 qts., 65c.; \$1.00 per peck; per bu., \$4.00.

Lawn Tennis Grass Seed. Tennis courts need grasses of a hardy nature, of fine leaf and close, compact growth. Our mixture will be found particularly adapted for the purpose (20 lbs. per bu.). Prices: 1 qt., 25c.; 75c. for 4 qts.; per peck, \$1.35; \$5.00 per bu.; 100-lb. lots and over, 24c. per lb.

MIXTURES FOR MISCELLANEOUS PURPOSES

Michell's Permanent Pasture Grass Seed. In the past few years ideas of what was the best way to establish a permanent grazing sod have undergone many changes. The old prevalent method of sowing timothy and clover has been found not only costly, but too short-lived to answer the purpose. The old custom has given way to the new, which is the sowing of a mixture of permanent grasses. Michell's Permanent Pasture Grass Seed is composed of about 10 of the best growing and most nutritious grasses and clovers for stock feeding or grazing. One sowing will last many years, although we advise additional sowing each autumn, just previous to which a light harrowing is recommended to give the grass a quick hold. Sow 3 to 4 bu. per acre on new land or 2 bu. on established pastures (15 lbs. per bu.). Prices: per qt., 20c.; 4 qts., 75c.; per peck, \$1.00; per bu. (20 lbs.), \$3.75; 100-lb. lots and over, 18c. per lb.

Michell's Permanent Hayfield Grass Seed. While timothy is still extensively sown for this purpose, this mixture is gradually being adopted by the progressive farmer. Its main advantages are that certain grasses in this mixture will grow better in varying conditions of soil, thus giving a full crop of hay on land that otherwise might produce but a half crop of timothy and clover. Our formula is the outcome of thorough trials in every kind of soil. Sow 3 to 4 bu. per acre on new lands or 2 bu. on established fields (15 lbs. per bu.). Prices: per qt., 20c.; 4 qts., 75c.; per peck, \$1.00; per bu. (20 lbs.), \$3.75; 100-lb. lots and over, 18c. per lb.

Michell's Poultry Yard Grass Seed. Chickens love grass and should be placed where they can get it as much as possible. We put plenty of clover seed in this mixture, as it is very nutritious, and the fowls relish it (15 lbs. per bu.), 20c. per qt.; 4 qts., 60c.; 90c. per peck; bu., \$3.90.

WHITE CLOVER

Choice recleaned for sowing on lawns, pastures, etc. Sow 10 to 12 lbs. per acre (60 lbs. per bu.). Per ¼ lb., 20c.; 75c. per lb.; 5 lbs., \$3.65; \$7.00 for 10 lbs.; per bu., \$40.00; per 100 lbs., \$65.00.

MICHELL'S IMPROVED GRAPE BAGS

MEANS A CROP OF PERFECT FRUIT.

The above illustration gives a good idea of how grapes look when bagged, and how they can look if not protected.

it is flavored more naturally because it does not require washing, it is protected from birds, insects and even the undesirable touch of a human being; if you have never used them give them a trial this year, and harvest a hundred per cent quality crop of grapes. They should be attached anytime after the small grapes have formed and have been sprayed at least once.

Thousands of these are sold by us annually, and they go a long way toward increasing the grape crop. They are attached in a jiffy, can be handled by an inexperienced person, they last a season regardless of weather.

Grapes ripen as early and as freely in them as though not protected by these bags,

CARBONDALE HYDROMETERS

These are highly recommended by the Pennsylvania State Department of Agriculture for testing the gravity of Lime Sulphur solution. One should be in the hands of every man who uses this material. Price, \$1.25. (Postpaid, \$1.35.) With directions.

LAMPS for vaporizing nicotine solutions, 80c. each.

Liquid Weed Killer can effectually be distributed with a watering can or in a sprinkling wagon.

HERBICIDE

This preparation is a thoroughly proven Weed Exterminator. Will not stain wood or stone work. It dilutes readily in water and can be applied with a sprinkling can or in a large area with a watering cart. For clay and sand tennis courts it is a perfect preparation. One part Herbicide dilutes to 40 parts of water, either hot or cold, clean or dirty. A gallon of Herbicide is capable of treating 120 square yards of surface.

MICHELL'S CLIMAX WEED KILLER Climax Lawn Sand

For use on Lawns and Grass Plots

"Climax Lawn Sand" is a unique combination of finely ground chemicals, which, when sprinkled over the grass, possess the remarkable property of destroying Moss, Chickweed, Plantains, Dandelion, and all other weeds on Lawns, Tennis Courts, Golf Greens, etc., at the same time promoting the growth of the finer grasses.

"Climax Lawn Sand" may be applied any time during the growing season of the year, namely, from beginning of April to the end of October.

The lawn must be absolutely dry; by that is meant that no rain or dew must be visible on the grass.

Ten to twelve a. m. during the months of April, May and October, nine to twelve a. m. during June, July, August and September, are the best hours for application.

Only apply in fine weather when the temperature is fairly high and when no rain appears likely for a day or two. This is most important.

After applying, the weeds blacken and die; the grass usually also becomes blackened and may remain so for a few days, but it quickly recovers its color, and young growths appear on the bare spots previously occupied by the weeds.

Should the weather be very hot and dry, the lawn should be thoroughly watered at the expiration of 48 hours after the application.

It acts as one of the most powerful fertilizers for grasses if applied as a top-dressing in the early spring. For top dressing as a fertilizer apply $\frac{1}{4}$ ton per acre.

ERADO WEED GUN

(See illustration)

As handy as a cane, which it resembles. Fill the reservoir, which holds about 2 quarts of liquid, with Herbicide or Michell's Weed Killer, diluted. It will destroy weeds of all kinds in lawns without hurting the grass. Press the sharp point of the gun into the heart of the weed until the flat stay pieces touch the ground, when a quantity sufficient to kill is discharged into the heart of the plant which is destroyed for all time. Price, \$1.00. Galvanized iron. (See cut.) Parcel Post weight, 2 lbs.

WIKHAM WEED GUN

A tubular staff 36 inches long can be filled with "Liquid Weed Killer." You push the point of the Eradicator when same is loaded into the crown and root of the dandelion and the root is forever destroyed without the least injury to the surrounding grasses.

Wikeham Weed Eradicator (complete), \$1.00.

MICHELL'S LIQUID WEED KILLERS

An effective combination of high-grade chemicals which, diluted in water at 1 to 40, destroys the roots as well as the tops of all weeds and vegetation to which it is applied.

One gallon diluted is sufficient to cover 100 to 150 square yards; and one or two applications are sufficient for an entire season. Does not injure marble, cement or fencing. The best time for applying is just after a rain.

Michell's

Improved

Grape

Bags

Thousands of bunches of grapes are wasted annually because they are not protected against the ravages of insects, birds, etc. Michell's Improved Grape Bags are economical, easily attached and last a season. The fruit ripens just as readily in them as it does in the open. The bags should be attached when the grapes are the size of a pea prior to which it is suggested that they be sprayed (even though not affected) against blight or fungus, the bags should be left attached until the fruit is ready to harvest.
